Hello! Nice to meet you ·ᴗ· I am a **technical builder** with experience across **software engineering, automation, and AI-assisted product development**, with an additional background in **healthcare and biomedical engineering**. I enjoy **rapidly prototyping ideas**, building tools, and experimenting with new technologies to improve workflows and user experiences. Outside of work, I'm a big **pet lover** and recently started a **pet influencer Instagram account** for my Russian Blue cat. I enjoy creating content and experimenting with AI-assisted editing and storytelling. I'm someone who believes work should be creative, fun, and meaningful — when you genuinely enjoy what you're building, the work-life balance tends to take care of itself.

CORE SKILLS

Cursor | Claude | AI-assisted coding | Prompt engineering | Automation workflows | Python | JavaScript | HTML/CSS | React | Next.js | Flask | FastAPI | API integrations | Vercel | Supabase | Git | CI/CD | Linux | AWS | SQL | Data analysis | Experiment design | Content strategy | Tableau | Grafana | Short-form editing

PROJECTS & EXPERIMENTS

Operation App for Bakery Factory

Version 1.0 · In progress

Lightweight operations app built with AI-assisted workflows

Live Demo | GitHub

- Built an operations app for a bakery factory to track employees and products, analyze productivity, and generate insights using the OpenAI API.
- Developed using AI-assisted coding with Cursor and built with Next.js.
- Deployed the application using Vercel for fast hosting and continuous deployment.
- Integrated the frontend with Supabase and worked through deployment, database, and environment setup issues.
- Used the project to explore rapid prototyping and lightweight product building for real-world operations.

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- AWS Certified Solutions Architect

EDUCATION

Master of Engineering Science

Biomedical Engineering (2017 – 2019)
University of New South Wales

Bachelor of Engineering

Pharmaceutical Engineering (2013 – 2017)
East China University of Science and Technology

ADDITIONAL

- Languages: English & Mandarin
- KARI Student Mentor
- Optus First Aider

REFEREES

- Available upon request

Influencer Growth & Content Creation

Current

Building audience, content systems, and experimentation loops across pet and physio brands

@volleyball_physio @mixel_blueheart

VOLLEYBALL PHYSIO — BRAND CREATIVE DIRECTOR

- Managing content production for a sports physiotherapy brand with 20k+ followers.
- Assisting with producing educational sports rehab content and supporting experiments with hooks, storytelling structures, and audience engagement ideas.
- Editing short-form videos with AI-assisted workflows and social-first creative thinking.

PET INFLUENCER PAGE – MIXEL

- Recently launched a Russian Blue cat Instagram account and started building repeatable content series.
- Using AI tools for scripting, editing, captions, and creative storytelling experiments.
- Exploring how audience growth, content style, and niche positioning work in practice.

PROFESSIONAL EXPERIENCE

Associate Software Engineer

Feb 2022 – Present

Optus · Networks Advanced Systems & Automation · Sydney

- Contributed to internal automation platforms including ZTP UI, NetBox Integration, Renaissance Network Automation, and Automation Portal.
- Built automated end-to-end tests using Playwright, improving release confidence and reducing manual testing effort.
- Developed backend and scripting tools using Python Flask and TypeScript.
- Built NetBox ingestion scripts to automate network data validation.
- Integrated testing workflows into CI/CD pipelines using Bamboo and OpenShift.
- Worked closely with network engineers during UAT and deployment troubleshooting.

AI TRIBE ROTATION

- Developed Kotlin-based webhook integrations for voice intent systems.
- Built Python scripts to transform JSON data pipelines.
- Implemented a Dockerised CI/CD proof-of-concept for development workflows.

IP NETWORKS AUTOMATION ROTATION

- Developed frontend features using React and Material UI.
- Worked with Python FastAPI and Flask backend services.
- Contributed to automation workflows for Nokia network devices using Ansible Tower.

Lead Teacher (Part-time)

Feb 2026 – Present

AI Camp · Reddam House North Sydney

- Teaching after-school AI classes for Year 7 students, introducing core concepts such as machine learning, data, and responsible AI.
- Designing and delivering interactive lessons that help students understand AI through hands-on activities and simple coding exercises.
- Helping students develop curiosity about technology while building foundational digital literacy skills.

Clinical Trial Administrator

Jul 2021 – Feb 2022

Novotech · Sydney

- Supported clinical research project coordination and documentation management across global trial sites.

Quality Engineer

Mar 2021 – Jul 2021

3M Australia · Contract · Sydney

- Supported quality management documentation and regulatory compliance processes.

QA Associate

Jan 2020 – Mar 2021

Homart Pharmaceuticals · Sydney

- Conducted product quality investigations and supported regulatory documentation.
